

# Maven Engineering Corporation

## PRECISION MACHINED PARTS MANUFACTURING

### COMPANY OVERVIEW

CAGE: 46YF5

### MISSION: QUALITY PARTS DELIVERED ON TIME

Maven Engineering is a woman-owned small business that was founded in 1946. We are a proven supplier of military parts to the U.S. Government and international customers worldwide. Maven is proud to manufacture all of our parts in the United States.

Our factory in Orange County, California gives us unparalleled access to customers, suppliers and a labor force that focuses on the aerospace industry. We have manufactured hundreds of parts for military and international customers across the spectrum of platforms: aircraft, armored vehicles, ships and missile defense.

At Maven, our focus is on **quality** and **delivery**. We have invested in CNC machinery, superb inspection equipment, and assembled a highly skilled team who understand our vision of customer satisfaction. Maven is both ISO 9001:2015 and AS9100D certified.

We specialize in machined parts with tight tolerances, whether made from castings, forgings, or bar stock. We can supply parts complete to print, just machine them to your specifications, or make specialized tooling for your particular application.

We supply parts for a wide array of fixed-wing and rotary-wing platforms including F-5®, F-15®, F-16®, C-130®, KC-135®, CH-47® and CH-53®, as well as for many land systems such as armored personnel carriers. Whether you are looking for a small or large production run, we provide competitive pricing and delivery.
